DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-28 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-28 of prior U.S. Patent No. 5,407,598 to Olson et al. This is a double patenting rejection.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claim 36 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear what is meant by the term "binder (tableting aid)" ... does it include the encapsulated halogen bleach?

Art Unit: 1751

5. Claim 30 recites the limitation "solid phase" in line 5; similarly, claim 31 recites "particulate"...claim 36 recites "continuous solid phase. There is insufficient antecedent basis for these limitations in the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 29-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 2 221 220 to Lley et al/Unilever Plc alone, or further in view of US Pat. 5,200,236 to Lang et al or US Pat. 4,759,956 to Amer et al.

The Lley et al '220 reference discloses a substantially rigid laundry bar (p. 5, line 19 et seq), construed by the Examiner as a "shaped solid", containing an encapsulated chlorine bleach (p. 2, line 16 et seq), an alkyl benzene sulfonic acid, construed as a wetting agent, and an organic sequestrant (see Table V .. p. 20). At the time of the invention, one of ordinary skill in the art could also turn to the Amer et al "956 reference (incorporated by reference in Lley et al) for disclosure of the equivalency of encapsulation of chlorinated trisodium phosphate as well as sodium dichloroisocyanurate (col . 5, lines 61 et seq) or similarly to Lang et al (col . 5, lines 44

Art Unit: 1751

et seq) as well as the availability of double coatings (col.1, line 66 et seq) applied to a chlorine bleach core. Selection of a size parameter of a cylindrical solid.. which could be the extruded bar .. would appear to be a matter of choice and entitled to little if any patentable weight. No claim stands allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John M. Petruncio whose telephone number is (571) 272-1323. The examiner can normally be reached on Monday-Fridays from ~9:30 AM to 6:00 PM.

7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Yogendra Gupta, can be reached on (571) 272-1316. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should
